

Winter Pistol League 2014

This years winter pistol league (22 Caliber Bullseye) must begin prior to October 19th and end in April to meet the requirements of the NH Pistol League that some of us compete in.

22 Caliber Bullseye is a NRA discipline requiring shooters to shoot a 22 caliber handgun (Iron sighted or scoped) one-handed at a target 50 feet away. There are three separate timed events per match with two matches shot totaling 60 rounds. 10 shots in ten minutes, two strings of 5 shots in 20 seconds and two strings of 5 shots in 10 seconds. Repeat match # 1.

The indoor pistol league shoots Wednesday and Thursday nights starting at 6 PM, a second relay if needed starts around 7:15 you only need to shoot one night per week unless you want to make up a missed match or shoot one ahead.

The NH Pistol League in an attempt to gain new shooters and clubs into their league has adopted a two handed version of this discipline this is for new shooters that need a year to hone their skills or the aging folks that still want to compete. New shooters will be expected to transfer over to a one handed shooting the following year once they become proficient.

Anyone interested please e-mail John Murray (murray06@tds.net) so I know how many shooters are planning on shooting and if you plan on shooting one or two handed. The cost is \$10.00 registration fee with a nightly match fee of \$4.00, this covers the cost of targets and an annual banquet at the end of the season. If you are interested in the NH Pistol League an additional registration fee of \$20.00 and \$2.00 nightly fee is required (will explain).

With that said I would like to start the season off with two weeks of practice beginning on Wednesday October 1st and Thursday October 2nd with the first official matches being shot on Wednesday October 15th and Thursday October 16th. I know these dates puts a damper on some hunters so show up when the freezer is full and join the fun whenever.

The league runs for 20 weeks (40 Matches) so our schedule would run from October until sometime in March depending on holidays and snow days.
